The Virginia Tech Mathematics Department is seeking a senior software developer to design, develop, and maintain robust, scalable and secure web-based applications for the Math Emporium. Duties will include software development, maintenance, integration, consultation, configuration, systems analysis, design and security services for applications and servers used by an Internet-based student community active 24/7. The person hired will have an opportunity to develop new applications as part of a leadership team developing and implementing innovative data-informed policies and strategies for supporting student learning. To view a full job description and position qualifications and to apply go to www.jobs.vt.edu and search for posting AP0170134. An online application is required. Please include a cover letter and a resume as part of the online application. Include on the resume the names, positions, and contact information of three professional references. Questions may be addressed to math_AT_math.vt.edu. Applications received by June 7, 2017, will receive full consideration.

Virginia Tech is an equal opportunity/affirmative action institution.
