CLASS POLICY SHEET
MATH 3054 CRN 84561

Instructor: Pengtao Yue
Email: ptyue@math.vt.edu
Phone: 540-231-7533
Office: McBryde 440
Office hours: MW 10:15-11:15am, Th 3:30-4:30pm, other time by appointment.

Course web page: 
http://www.math.vt.edu/people/ptyue/class_homepages/3054_84561.html

Class Time and Location: MWF 9:05-9:55am, WLH 345

Prerequisite: Math 2214 (Ordinary Differential Equations).

Grading Scheme:
The following guideline will be used to calculate grades:

- Homework: 45%.
- Project: 15%.
- Quizzes: 20%.
- Final Exam: 20%.

This scheme is tentative and the percentages may be changed slightly with prior notice. 90% of the total grade guarantees at least an A-, 80% guarantees at least a B-, 70% guarantees at least a C-, and 60% guarantees at least a D.

Homework and project:
The homework will be assigned on a weekly basis and the lowest homework will be dropped. There will be one project which is due before the end of classes. Late work will not be accepted except for valid reasons and consultation with the instructor in advance. You may have discussions with your classmates, but you are not allowed to copy solutions from others’ work. The homework and project that you hand in must be the product of your own understanding of the material. The students who cheat on their homework or project will be penalized.

Quizzes:
In-class quizzes are planned on a bi-weekly basis. Announcement will be made in the class prior to each quiz date. The lowest quiz will be dropped and no make-up quizzes will be given.

Final Exam:
A comprehensive final exam will be given on 10:05am-12:05pm, Dec 11, 2015.

Honor system:

The Virginia Tech Honor Code applies to all graded work, i.e., homework, project, quizzes, and final exam, in this course. Students are responsible for understanding and adhering to the Honor Code.
