 - Using Dominant Modes for Optimal Feedback Control of Aerodynamic Forces (with I. Akhtar, J. Burns and M. Naqvi), *Journal of Aerospace Engineering*, Vol. 227, pages 1859–1869 (2013).
 - Sensitivity and Uncertainty Quantification of Random Distributed Parameter Systems (with V. Leite Nunes and H.-W. van Wyk), *Mathematics in Engineering, Science and Aerospace*, Vol. 4, No. 2, pages 117–129 (2013).

- Using Fréchet Sensitivity Analysis to Interrogate Distributed Parameters in Random Systems, (with V. Leite Nunes and H.-W. van Wyk), in Proceedings of the 2013 American Control Conference, Paper Number MoA14.4, June (2013).
- Adjoint and Truncation Error Based Adaptation for 1D Finite Volume Schemes, (with J. M. Derlaga and C. J. Roy), in Proceedings of the 21st AIAA Computational Fluid Dynamics Conference, AIAA Paper Number 2013–2865, July (2013).
- Finite Volume Solution Reconstruction Methods for Truncation Error Estimation, (with T. S. Phillips, J. M. Derlaga, and C. J. Roy), in Proceedings of the 21st AIAA Computational Fluid Dynamics Conference, AIAA Paper Number 2013–3090, July (2013).
- Error Transport Equation Boundary Conditions for the Euler and Navier-Stokes Equations, (with T. S. Phillips and C. J. Roy), in Proceedings of the 52nd AIAA Aerospace Sciences Meeting, AIAA Paper Number 2014–1432, January (2014).
- A New Zonation Algorithm with Parameter Estimation Using Hydraulic Head and Subsidence Observations (with M. Zhang, T. Burbey, and V. Leite Nunes), *Groundwater*, Vol. 52, No. 4, pages 514-524 (2014).
- Basis Selection and Closure for POD Models of Convection Dominated Boussinesq Flows, (with O. San), in Proceedings of the 21st International Symposium on Mathematical Theory of Networks and Systems, Groningen, The Netherlands, Paper MoA05.4, pages 132-139, July (2014).
- A Reduced Order Model of the Indoor-Air Environment for Energy Efficient Building Studies, (with S. Ben Ayed and E. M. Cliff), in Proceedings of the 19th IFAC World Congress, Cape Town, South Africa, pages 612-619, August (2014).
- Parametric Reduced Order Models Using Adaptive Sampling and Interpolation, (with K. R. Pond and L. Zietsman), in Proceedings of the 19th IFAC World Congress, Cape Town, South Africa, pages 7773-7778, August (2014).
- Compensators via \mathcal{H}_2 -based Model Reduction and Proper Orthogonal Decomposition, (with S. Gugercin and L. Zietsman), in Proceedings of the 19th IFAC World Congress, Cape Town, South Africa, pages 7780-7784, August (2014).
- Development of Control Benefit Evaluation Tool for Small Commercial Buildings, (with D. Kim, E. Cliff, and J. E. Braun), in Proceedings of the 2014 ASHRAE/IBPSA-USA Building Simulation Conference, Atlanta, pages 64-71, September (2014).

- Principal Interval Decomposition Framework for POD Reduced-Order Modeling of Convective Boussinesq Flows (with O. San), *International Journal for Numerical Methods in Fluids*, Vol. 78, No. 1, pages 37–62 (2015)
- Gradient-based Estimation of Uncertain Parameters for Elliptic Partial Differential Equations (with H.-W. van Wyk), *Inverse Problems*, Vol. 31, No. 065008 (2015)
- Development, Validation and Application of a Coupled Reduced-order CFD model for Building Control Applications (with D. Kim, J. E. Braun, and E. M. Cliff), *Building and Environment*, Vol. 93, No. 2, pages 97–111 (2015)
- Using Functional Gains for Effective Sensor Location in Flow Control: A Reduced-order Modelling Approach (with I. Akhtar, J. Burns, H. Imtiaz, and L. Zietsman), *Journal of Fluid Mechanics*, Vol. 781, pages 622–656 (2015)
- Model Reduction for DAEs with an Application to Flow Control, (with S. Gugercin), in *Active Flow and Combustion Control 2014*, R. King, ed., *Notes on Numerical Fluid Mechanics and Multidisciplinary Design*, Volume 127, Springer, pages 381–396, (2015).
- Adjoint and Truncation Error Based Adaptation for Finite Volume Schemes with Error Estimates, (with J. Derlaga, T. S. Phillips, and C. J. Roy), in *Proceedings of the 53rd AIAA Aerospace Sciences Meeting*, January (2015).
- Performance Evaluation of an RTU Coordination Controller Using a Reduced-Order CFD Coupled Model, (with J. Braun, E. Cliff, J. Hu, and D. Kim), in *Proceedings of the 2015 ASHRAE Annual Conference*, *ASHRAE Transactions*, Volume 121, January (2015).
- Optimal Sensor Location in the Control of Energy-Efficient Buildings, (with J. A. Burns and E. M. Cliff), in *The Princeton Companion to Applied Mathematics*, N. J. Higham, M. R. Dennis, P. Glendinning, P. A. Martin, F. Santosa, and J. Tanner ed., Princeton University Press, pages 763–767, September (2015).
- A Goal-Oriented Reduced-Order Modeling Approach for Nonlinear Systems (with Z. Wang and L. Zietsman), *Computers and Mathematics with Applications*, Vol. 71, No. 11, pages 2155–2169 (2016)
- Optimal Control of Indoor-air Cooling in Buildings Using a Reduced Order Model (with S. Ben Ayed, D. Kim, and E. M. Cliff), *Energy*, Vol. 116, No. 1, pages 1191–1204 (2016)
- High Fidelity Reduced Order Models for Wildland Fires, (with S. Gugercin, A. Lattimer, and B. Lattimer), in *Proceedings of the 5th Annual Fire Behavior and Fuels Conference*, April (2016).

- Computationally Efficient Wildland Fire Spread Models, (with S. Gugercin, A. Lattimer, B. Lattimer, and K. Luxbacher), in Interflam 2016: Proceedings of the 14th International Fire Science & Engineering Conference, Volume 1, pages 305–316, July (2016).
 - Feedback Stabilization of Fluids Using Reduced-Order Models for Control and Compensator Design, (with S. Gugercin and L. Zietsman), in Proceedings of the 55th IEEE Conference on Decision and Control, pages 7579–7585, Paper Number WeC21.5, December (2016).
 - Error Transport Equation Boundary Conditions for the Euler and Navier-Stokes Equations (with J. M. Derlaga, T. S. Phillips, and C. J. Roy), Journal of Computational Physics, Vol. 330, pages 46–64 (2017)
 - Thermal Morphing Anisogrid Smart Space Structures Part 2: Ranking of Geometric Parameter Importance, Trust Region Optimization, and Performance Evaluation (with A. Phoenix and P. Tarazaga), Journal of Vibration and Control, pages 1–21 (2017)
 - Learning-based Robust Stabilization for Reduced-Order Models of 2D and 3D Boussinesq Equations (with M. Benosman, O. San, and B. Kramer), Applied Mathematical Modelling, Vol. 49, pages 162–181 (2017)
 - Robust POD Model Stabilization for the 3D Boussinesq Equations Based on Lyapunov Theory and Extremum Seeking, (with M. Benosman and B. Kramer), in Proceedings of the American Control Conference, pages 1827–1832 (2017)
 - POD Models for Positive Fields in Advection-Diffusion-Reaction Equations, (with A. Lattimer), in Proceedings of the American Control Conference, pages 3797–3802 (2017)

 - Control of PDE systems with delays (with J. A. Burns and T. L. Herdman), *Proceedings 1st International Federation of Automatic Control Conference on Control of Partial Differential Equations*, pages 85-90, September, 2013.
 - Parametric Reduced Order Models Using Adaptive Sampling and Interpolation, (with J. Borggaard and K. Pond), *Proceedings of the 19th International Federation of Automatic Control World Congress*, 10.3182/20140824-6-ZA-1003.02664, pages 7773-7778, August 2014.
 - Compensators via H2-based Model Reduction and Proper Orthogonal Decomposition, (with J. Borggaard and S. Gugercin), *Proceedings of the 19th International Federation of Automatic Control World Congress*, 10.3182/20140824-6-ZA-1003.02689, pages 7780-7784, August 2014.
 - Using Functional Gains for Effective Sensor Location in Flow Control: A i Reduced-order Modelling Approach (with I. Akhtar, J. Borggaard, J.A. Burns, H. Imtiaz), *Journal of Fluid Mechanics*, Vol 781, p 622–656, 2015.
 - A Goal-Oriented Reduced-Order Modeling Approach for Nonlinear Systems (with J. Borggaard and Z. Wang), *Computers and Mathematics with Applications*, Vol. 71, No. 11, pages 2155–2169 (2016)
 - Feedback Stabilization of Fluids Using Reduced-Order Models for Control and Compensator Design, (with J. Borggaard and S. Gugercin), in

Proceedings of the 55th IEEE Conference on Decision and Control, pages 7579–7585, Paper Number WeC21.5, December 2016.

- Control of a thermal fluid heat exchanger with actuator dynamics. (with J. A. Burns), in Proceedings of the 55th IEEE Conference on Decision and Control, pages 3131–3136, Paper Number TuA15.4, December 2016.
